A World of WILD Love

Our world has never felt more fragmented by fear, disease, hatred, and injustice. **WILD** is a pop album breathing color and courage on those feeling wilted and weak. The album was inspired by Hope's personal battles through insecurity, anxiety, and health issues. Wild's upbeat and honest anthems ignite bravery despite heartache. **WILD** empowers others to love courageously and believe in the impossible.

WILD involves a unique array of musical textures, including the 80's electric-pop sounds of "STARS" and elegantly raw symphony in "Home". This project features magnetic melodies such as "Fragmented" and choral vocals on "In the Dark". Produced by David Sposato, this project carries a clean, yet vulnerable sound.

Bio

Hope Wentz is a pop singer/songwriter, local to the DFW Metroplex. She's also the owner of HeART of Hope, LLC and a board-certified music therapist, serving children with special needs. Hope carries a zeal for child-likeness, endurance, and authenticity. Her songs offer a disarming nature in their honest anthems, heartfelt tones, and encouraging words.

Drawing from the lyrical depth and upbeat rhythms of bands like Coldplay, along with the wide vocal range of Kelly Clarkson, Hope loves to "wordsmith" songs that offer an artistic challenge. More than singing and artistry, Hope loves people. She believes in creating music that serves others with compassion, courage, and a WILD love. When she isn't working, you may find her journaling along with a cup of hot tea, exploring a new place, or playing Phase 10 with her friends.
